HOBIES

The term 'metaverse', which we have heard about recently, got me very excited and curious, so I started learning graphics and design. Besides, I used to have a blog I wrote about space and the universe, but it's closed now because I couldn't deal with it due to the density.

PROFILE

In 2017, I started my university and software adventure in Kırklareli. In 2018, I transferred to Istanbul Üsküdar University and decided to continue my education and training life here. I will graduate in 2022. In the summer of 2021, I did my compulsory internship at aliniyor.com. Here I learned the basics of web development (HTML, CSS, JavaScript) and C#. After the internship, I was interested in this field and I continued to improve myself. I developed my Python knowledge and learned Flask and Django. Then I learned MongoDB for database operations. I am currently continuing my education with ExpressJs and I am trying to develop a backend application. In this adventure that I set out on, I aim to constantly improve myself to be one of the best in the sector.

EMPLOYMENT HISTORY

aliniyor.com, Intern
Istanbul
Jul 2021 – Sep 2022

This was a marketplace project. I learned basic web programming skills and we used the C# framework, .Net Core. As a result, I learned the .Net Core framework here and tried to understand and use the MVC model.
